NATIONAL UNIVERSITY OF SINGAPORE

Department of Electrical and Computer Engineering, College of Design and Engineering

CS2103DE—Software Engineering

Academic Year 2025/2026, Semester 2

TEAM PROJECT

TEAM PROJECT RUBRICS

Criterion	Description	Points
Project Planning & Requirements	Clearly defined project goals and requirements, well-documented user stories or functional requirements, and use of appropriate requirement-gathering techniques.	15
Software Architecture & Design	Well-structured software architecture, appropriate design patterns, clear diagrams (UML, flowcharts, etc.), modularity, scalability, and maintainability.	15
Implementation & Code Quality	Clean, well-structured, and efficient code following best practices. Consistent coding style, meaningful variable names, adherence to SOLID principles, and proper documentation.	20
Version Control & Collaboration	Proper use of Git (or equivalent) with meaningful commit messages, proper branching, pull requests, and balanced contributions among team members.	10
Testing & Debugging	Comprehensive testing strategy with unit tests, integration tests, and UI tests. High test coverage and automation where applicable.	10
Project Documentation	The project should deliver a User Guide (UG) and a Developer Guide (DG). These guides should include well-structured documentation, setup instructions, and system architecture explanation. A report is not necessary, but important instructions can be attached to a report.	10
User Experience (UX) & UI Design	Well-designed, intuitive, and user-friendly interface. Responsive and accessible.	10
Teamwork & Professionalism	Effective collaboration, balanced contribution from all team members, and professional communication.	10
Total Score		**100**

SCORING BREAKDOWN[1]

Project Planning & Requirements (15 points)

[1]THE PROJECT CONTRIBUTES 25% TO THE FINAL GRADE. TWO MARKS ARE ALLOCATED FOR ATTENDANCE, WHILE THE REMAINING 23 MARKS ARE BASED ON THE PROJECT. THE RUBRIC IS SCORED OUT OF 100 POINTS AND WILL BE SCALED DOWN TO 23 MARKS, WITH 18 MARKS ASSIGNED TO TEAM EFFORT AND 5 MARKS TO INDIVIDUAL EFFORT.

- **13-15 points:** Clearly defined goals, detailed and well-documented requirements.
- **10-12 points:** Mostly clear goals, some missing or unclear details.
- **6-9 points:** Vague or incomplete requirements.
- **0-5 points:** Poorly defined or missing requirements.

Software Architecture & Design (15 points)

- **13-15 points:** Excellent modular design with clear diagrams.
- **10-12 points:** Good design but missing some details.
- **6-9 points:** Basic architecture, lacks modularity or scalability.
- **0-5 points:** Poor or non-existent design.

Implementation & Code Quality (20 points)

- **18-20 points:** Well-structured, efficient, maintainable, and well-documented code.
- **14-17 points:** Mostly clean and efficient, minor issues.
- **10-13 points:** Functional but unoptimized, inconsistent coding style.
- **5-9 points:** Poor readability, inefficient, lacks structure.
- **0-4 points:** Unreadable, unstructured, major logic errors.

Version Control & Collaboration (10 points)

- **9-10 points:** Excellent Git usage with well-documented commits.
- **6-8 points:** Good version control with some inconsistencies.
- **3-5 points:** Minimal version control, unbalanced contributions.
- **0-2 points:** No version control or single-member management.

Testing & Debugging (10 points)

- **9-10 points:** Comprehensive testing with automation and high coverage.
- **6-8 points:** Good test coverage, but minor gaps.
- **3-5 points:** Basic testing with some missing cases.
- **0-2 points:** Poor or no testing.

Project Documentation (10 points)

- **9-10 points:** Well-documented project with clear explanations.
- **6-8 points:** Decent documentation with some missing details.
- **3-5 points:** Basic documentation, lacking key aspects.
- **0-2 points:** Poor or missing documentation.

User Experience (UX) & UI Design (10 points)

© 2026 National University of Singapore. All rights reserved.

- **9-10 points:** Excellent UI/UX design, user-friendly.
- **6-8 points:** Decent UI with minor usability issues.
- **3-5 points:** Basic UI, not very intuitive.
- **0-2 points:** Poor UI, difficult to use.

Teamwork & Professionalism (10 points)

- **9-10 points:** Excellent collaboration, balanced contributions.
- **6-8 points:** Good teamwork, minor imbalances.
- **3-5 points:** Uneven contribution, some conflicts.
- **0-2 points:** Poor teamwork, lack of communication.

FINAL GRADING

- **90-100**: Outstanding project, excellent execution in all areas.
- **80-89**: Strong project, minor issues but very solid.
- **70-79**: Good project with some noticeable weaknesses.
- **60-69**: Acceptable but needs improvement.
- **Below 60**: Below expectations, needs major revision.
